

K12 Alerts

To improve communications between our school and our families, we have contracted with K12 Alerts' Award Winning Patented communication system.

K12 Alerts notifies parents via a text alert and an email alert in case of a school emergency. We believe this is an important core element of school-to-home communication. This communication system will also allow us to implement a school-wide monthly newsletter with important information about school events and announcements.

K12 Alerts requires a cell phone number, name of your service provider, and your email address. Please fill out the following information in its entirety. All information provided will be used for the sole purpose of Emergency Alerts and Monthly Newsletters and will be kept private and confidential.

Name _____

Cell Phone _____ Service Provider _____

Email _____
